

21) IF and aggregate function:-

A data table is there in which the employee details are there.

Emp Code, Employee Name, Address, city, Region, Department, Basic.

1) Here going to calculate total Basic salary.

So going to sum all column in Basic

Syntax :- $[=SUM(G1:G21)]$

2) Total average salary:-

$[=AVERAGE(G1:G21)]$

3) maximum Salary :-

$$[= \text{MAX} (G_{11}:G_{21})]$$

4) minimum Salary :-

$$[= \text{MIN} (G_{11}:G_{21})]$$

5) COUNT no of salary :-

$$[= \text{COUNT} (G_{11}:G_{21})]$$

6) Count no of employee by name :-

$$[= \text{COUNTA} (G_{11}:G_{21})]$$

7) Large salary :-

$$[= \text{LARGE} (G_{11}:G_{21}, 1)]$$

array
↓
In which it states
1st highest salary

8) Small salary :-

$$[= \text{SMALL} (G_{11}:G_{21}), 1]$$

9) Find max 2 salary :-

$$[= \text{LARGE} (\text{UNIQUE} (G_{12}:G_{21}), 2)]$$

Unique function :-

extract unique value from range and removes duplicates.

Syntax :- $[= \text{UNIQUE}(\text{array})]$

10) Find 3 min salary :-

$[= \text{SMALL}(\text{LARGE}(\text{UNIQUE}(G12:G1), 2), 3)]$

11) Find total salary of marketing team :-

$= \text{SUMIF}(\text{range}, \text{criteria}, [\text{sum_range}])$

SUMIF :-

Add value to meet a specific condition

$= \text{SUMIF}(F2:F21, \overset{\substack{\uparrow \\ \text{Marketing}}}{F4}, G12:G121)$

$\downarrow$ Department $\downarrow$ Salary (Basic)

Here it value marketing department total salary only.

12) Total salary of employees who all are earning above 10000 :-

$= \text{SUMIF}(G12:G121, ">10000", G12:G121)$

$\downarrow$ Salary Column $\downarrow$ salary range above 10000.

13) Earning 10000 :-

$$= \text{SUMIF} (G12 : G121, ^, 10000, G12 : G121)$$

14) Average salary of West region employees :-

$$[= \text{AVERAGEIF} (E2 : F21, "W", G2 : G21)]$$

Average IF :-

$$= \text{AVERAGEIF} (\text{range}, \text{Criteria}, \text{average-range})$$

$E2 : F21 \Rightarrow$ region & department.

"W" $\rightarrow$ West region

$G2 : G21 \Rightarrow$ salary.

15) Find maximum salary in R&D department :-

MAXIFS :- maximum highest value that meets one or more conditions.

Syntax :- $[= \text{MAXIFS} (\text{max-range}, \text{criteria-range}, \text{Criteria})]$

$$[= \text{MAXIFS} (G12 : G121, F2 : F21, F5)]$$

$\downarrow$ $\downarrow$ $\downarrow$ R&D
 Basic range Department range

16) Find total salary of marketing team of north region employee.

$$= \text{SUMIFS}(G2:G21, F2:F21, F16, E2:E21, "N")$$

Basic ← Department ← north region ← north
in marketing Region

17) Avg salary of emp who are earning 10K in Training dept.:-

$$= \text{AVERAGEIFS}(G2:G21, G2:G21, 10000, F2:F21, F21)$$

18) How many employees working from Training marketing department in north region.

$$= \text{COUNTIFS}(G2:G21, G12, E2:E21, E12, F2:F21, F12)$$
